Subject						
Companion bill to LRB-4695/3 - Governor's budget reform bill						

#### Assumptions Used in Arriving at Fiscal Estimate

Costs shown in the worksheet present changes in fiscal year 2002-03 as affected by the bill, with the exception that the shared revenue reduction is shown at the completely phased out level: -\$1,039,709,900 GPR in 2005. The budget reform bill includes a reduction of \$350,000,000 in 2002-03.

This bill addresses a projected budget gap of \$1.26 billion in the state's general fund by reducing state and local government appropriations. In addition, funds are transferred from program and segregated revenue sources into the general fund balance. The bill includes a number of initiatives intended to preserve education quality; provide services to the elderly, poor and disabled; increase public safety and security; and enhance worker training and economic development.

Major spending and revenue adjustments (in Millions) can be summarized as follows:

GPR Reductions: -\$58.3 in 2001-02 and -\$893.0 in 2002-03

Program/Segregated Lapses: \$18.1 in 2001-02 and \$18.7 in 2002-03 Medical Assistance Increases: \$37.2 in 2001-02 and \$37.2 in 2002-03

#### **Long-Range Fiscal Implications**

County and municipal general revenues are reduced by \$350 million in 2002-03 and \$1.039 billion by 2004-05 compared with current law.

With the exception of increases in local school district debt service costs above fiscal year 2001-02 levels, state support for two-thirds of local school costs is maintained.

Growth in county and municipal property tax levies for operating costs will be limited to the rate of inflation, growth in population and transfers or consolidations of services.

State spending will be reduced by \$1.1 billion by 2004-05 compared with current law.

Wisconsin tax ranking is expected to further decrease relative to other states due to avoiding state or local tax increases to address budget gaps.
